

IT Specialist (m/f/d) in Robotics Development starting now

About us

The leap in time Lab is a well-known research institute in Darmstadt that was founded in 2016 as a Spin-Off of the Technical University of Darmstadt. We pursue the goal of researching future working worlds to make them tangible for science, business and society.

Your Tasks

We are looking for an experienced programmer to support our team, who already has experience in robotics & AI. Our structure allows short communication channels between the development team and the requirements planning, which enables fast feedback in terms of agile software development. Due to your reliability and independence, you can expect the following tasks, among others:

- Programming of our robotics
- Integration of robot software and hardware
- Programming of new AI modules for robotics software
- Quality assurance of software modules
- Integration of new requirement in robots

Your Profile

If the following characteristics mostly apply to you, then our team is the right place for you:

- Experience in programming and integrating AI.
- Programming experience with robotics software; especially ROS, alternatively very good Linux knowledge and experience with distributed systems.
- Experience in Agile software development
- Quality assurance of the software
- Interest in innovative topics such as the future of the working world and robotics
- Ability to contribute own ideas
- Desire to help shape the future

Benefits

- An exciting, innovative working environment
- The opportunity to make a difference and help shape a young company
- Working with the latest technologies
- Work in a dynamic and collegial team
- Comprehensive and continuous professional development
- Flexible working hours
- Large proportion of remote work possible (by arrangement)

leap in time GmbH | Donnersberggring 16 | 64295 Darmstadt
