leap in time GmbH | Donnersbergring 16 | 64295 Darmstadt

Full Stack Developer (m/f/d) - Full-time
wanted immediately

Are you ready to drive technical innovation in the field of full stack development and create innovative solutions that shape the future of work? Then you've come to the right place!

About Us

The leap in time Lab (www.leap-in-time.com) is a dynamic and innovative research institute in Darmstadt, known from the press and proud of its roots as a spin-off of the Technical University of Darmstadt. Since our foundation in 2016, we have passionately dedicated ourselves to researching future working environments. We translate scientific findings into practical applications and shape the interface between research, business and society. Our team works every day to not only predict the future of work, but to actively shape it and make it tangible.

Your Mission

As a Full Stack Developer at leap in time Lab you will:

- Work with the latest technologies and AI applications and transform them into innovative solutions.
- Work in agile project teams to develop efficient and scalable software products.
- Design and further develop the system architecture of our innovative research platforms.
- Create both front-end and back-end systems based on high performance and usability.
- Develop interfaces to external APIs and implement integrations.
- Integrate secure authentication methods to ensure data privacy and security.
- Cover the entire software development lifecycle, from brainstorming to development and deployment.
- Maintain, optimise and extend existing web applications.

Your Profile

If the following characteristics apply to you, then you are the right person for our team:

- Successfully completed training as an IT specialist or a comparable degree.
- Profound knowledge and practical experience with REST APIs and containerisation with Docker.
- Good knowledge of the programming languages Python, JavaScript and web technologies such as HTML and CSS.
- Experience in working with software version management systems (e.g. GitLab).
- Proven ability in frontend and backend development.
- Fluency in written and spoken German and English.
- Ability to work both independently and as part of a team.
- Experience in agile software development.

We Offer

- An inspiring working environment that bridges the gap between theory and practice.
- An open and creative team that values your ideas and personal development.
- The opportunity to make a difference and help shape a young company.
- Working with state-of-the-art technologies.
- Unique projects in the field of robotics and AI.
- Comprehensive and continuous professional development.
- Flexible working hours.
- Remote work by arrangement.
- Mobility through the €49 ticket.
- Capital-forming benefits if applicable.

Are you ready for your leap in time?

Then send us your complete application documents by 20 November 2023, including
Letter of motivation, CV, current grades and relevant certificates, stating your salary expec-
tations and earliest possible starting date by e-mail to:

info@leap-in-time.com

We look forward to working with you
shaping the future of work!
